Thank you for purchasing our RAPID Slit Seal. Please read this manual carefully before use and save this manual for your future use.

Please note that product specifications and packings may change without prior notice.

**Announcement for your use with ease.**

**[Purpose of use]**

This product can be used for research purposes only.

**[Notes for use]**

Handle this product carefully when unpacking from the bag.

Do not process this product in autoclave treatment.

**[Storage and disposal of product]**

Store at room temperature and in a place not exposed to direct sunlight. To dispose the product after use, comply with local laws and ordinances, and process properly according to the regulations of your facility.

---

**Instructions**

*Please wear gloves before use.*

1. The film with a red indication is a release liner.

Peel off the release liner to expose the adhesive surface.

Remove the release liner with a red indication and expose the adhesive surface.

2. Paste the RAPID Slit Seal on the 96-well plate and make sure holes of RAPID Slit Seal are correctly positioned on each well spot.

Remove the protective film before sampling or dispensing. If used without removing the protective film, the needle or the tip can not puncture the film. If the protective film stays on and is left at 100°C, the edge of the protective film may be curved.
